ADC1443D160W1 ADC1443D160W1 Demo board With ARRIAII GX FPGA

IDT'S ADC demoboard is suitable for dynamic performance evaluations from low to high IF configuration. The FPGA eases the evaluation and analysis of the ADC dynamic and enables use of the full JESD204B feature set.

Status: **Active**

Features

- SMA connector for clock and analog input signals
- On board Data clock generator for ADC and FPGA
- On board ARRIAI GX FPGA for JESD204B data acquisition
- 2 dual ADC on same PCB to easily evaluate the Multi ADC synchronization
- Single power supply (on-board regulators)
