

Multi-size wire stripper & cutter - 5023

PRODUCT ID: 147

Description

We've upgraded our basic 'adjustable' wire strippers to these multi-sized wire strippers. They include: 20-30 AWG strippers, wire cutters, 'plier' tips, and a wire loop. Ground blades for precision cutting. Spring return, comfy molded handles and a closing-lock.

Great for general usage, we use them for standard 22 AWG solid-core breadboarding wire and 26 AWG stranded ribbon cable, sometimes for other thin wires like thicker wire wrap. They sometimes don't work so well for 30 AWG - that's the trade off with the basic tools. If you need precision, high repeatability and extra comfortable rubber grips check out our professional wire strippers from Hakko
